

Planning Application 20/04313/FUL - Land at the Barn Bradford Road Rudloe Corsham SN13 0QY

Further to my representation dated 7th July 2020 on the above planning application, additional information has come to light with regard to pedestrian access. Inter alia, I said the following in my 7th July representation: *“There appears to be the possibility of pedestrian link between the application site and the Bellway development across an undeveloped area at the south side of the development”* and *“What is the ‘sustainable pedestrian access plan?’”*

The additional information is that the Bellway Dickens Gate development has now been completely fenced off from ‘land at the Barn’ giving no possibility of any access between the two – see the photographs below.

This means that, as there is no footpath along the Bradford Road here for a considerable distance in either direction, there is no pedestrian access to this site.

For this reason alone, apart from the other considerations detailed in my 7th July representation, this application is not viable.

Sincerely

Paul Turner
